

# ApneaRx<sup>®</sup>

## Micro-adjustable Sleep Apnea Appliance

Sleep apnea patients need a clinically effective interventional therapy, for many that is ApneaRx

Advancing the Science of Sleep Medicine

## ApneaRx – Custom Fitted, Adjustable “Boil and Bite” Oral Appliance

ApneaRx is custom molded to each individual’s mouth and is the only semi-custom boil and bite device that can adjust the jaw in 1mm increments up to 10 mm (just like custom oral appliances) without the use of screws and torsion straps. ApneaRx is reimbursed by many private insurers under HCPCS Code E0485 – prefabricated oral appliance. Please check with the insurance company to confirm its coverage policies.

### ApneaRx Key Features – In a Class by Itself

#### Advanced Design

Patented mechanism to adjust and maintain jaw position. FDA cleared for the treatment of snoring and sleep apnea.

#### Posi-Lock™

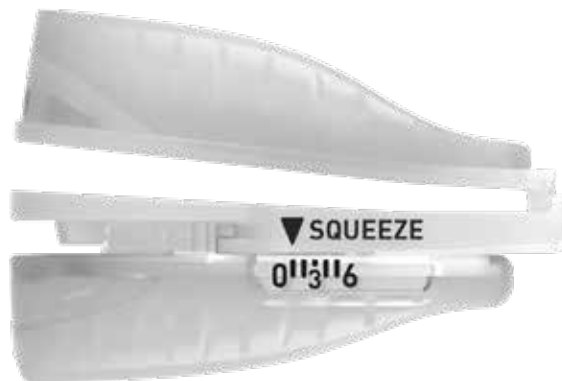

Jaw position can be set and relocked at any time.

#### Full-Flex™

Full vertical movement for greater comfort.

#### Multi-Patented Design

Breakthrough design with all the features medical professionals demand.

#### No Risk Guarantee

Full refund or replacement within 30 days of patient use.

### All Clinical Stakeholders Benefit

- Sleep MDs – ApneaRx, used as a diagnostic tool, may help determine which patients are responders or non-responders for custom oral appliance therapy.
- Sleep Dentists – When a custom oral appliance breaks, ApneaRx is a quick temporary fix. As a trial device, ApneaRx helps fence sitters move forward with a custom oral appliance therapy.
- DMEs – ApneaRx provides new revenue and transition treatment option for failed CPAP patients
- Patients – Offers an affordable, easy to use, comfortable and clinically effective “transition” therapy for sleep apnea.

### More Patient Reasons for ApneaRx

- Alternative to CPAP for frequent travelers and patients with respiratory problems.
- Affordable choice for patients without insurance or with high deductible plans.
- Good solution for snoring patients who do not have sleep apnea.
- Technician or patient can fit. Future adjustments can be made by patient.
